

Why Should We Lease?

Equipment leasing provides a tax oriented avenue to acquire business equipment. It is fixed rate financing with no money down, conservation of credit, and allows your business to retain precious cash while providing a means to acquire equipment and reduce taxes by writing off the monthly payment. **One Source Capital's** philosophy is to provide fair, honest financing options that make you a customer for life, not just the term of your lease. We accomplish this through superior service and flexible options. We offer competitive pricing and creative structuring to fit your needs.

One Source Capital is partnering with **Asbury Sales International, Inc.**, to provide financing for their fine products. In today's economic situation now is the time to preserve your cash. In tough financial times, it's smart to diversify your sources of financing. Banks typically require a 20% down payment (or more) before they will consider financing a machine. We typically provide 100% financing leaving cash in your company's pockets!!
