

# ELAN ECO 60

For throughputs up to 80 kg/h

The modular Elan Eco briquetter is designed for small and also mobile applications.

- \* **Flexible system layout**
- \* **Small footprint**
- \* **Small investment**
- \* **User friendly operation**
- \* **Low cost operational wear**
- \* **Optimal cost-benefit calculation**

# ELAN ECO 60

The briquetter Elan Eco has a modular design with the following options:

- \* Level control in the silo (allows automatic start/stop of the briquette press)
- \* Tong-cylinder for extreme slippery material
- \* Large silo system for the connection of several presses
- \* Bagging system with 8 stations for 30, 40 or 60 litre bags

Aluminium foil

Paper granulates

Wood shavings

Wood dust

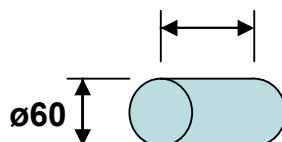

Textile granulates

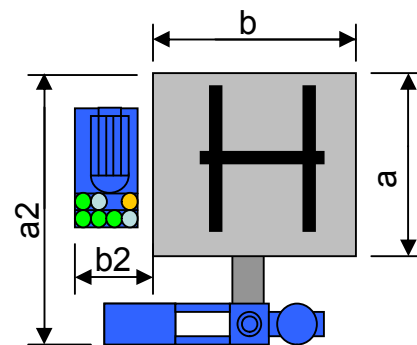

Cellulose

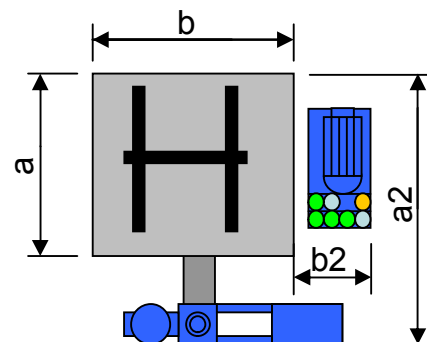

Adjustable briquette length, **20 - 100**  
 20 – 100 mm.
